ENGLISH - REGULATION AND COMPLIANCE

APPLICABLE REGULATIONS AND RADIO EQUIPMENT COMPLIANCE

The radio equipment shall be manufactured in such a way as to ensure the protection of the health and safety of persons, animals and property, including the objectives regarding the safety requirements of Directive 2014/53/EU and its implementing legislation, Directive 2011/65/EU (RoHS) for the safety of materials and waste disposal, compliance with the essential requirements of art. 3 of Legislative Decree no. 128/2016.

WARNINGS AND SAFETY INSTRUCTIONS

BEFORE INSTALLATION

- 1- Read this user manual carefully and keep it in a safe and accessible place.
- 2- Check the integrity of the product, if the product is not intact, do not connect it to any power source and contact your dealer.
- 3- Installation and maintenance of the appliance must only be carried out by qualified personnel. Installation of the product by persons without professionalism, dexterity and experience in electrical components and car accessories can be dangerous and may expose you to the risk of short circuits, injuries or other risks.
- 4- Before proceeding with the installation, connect the wiring harness supplied with the car, and try all the functions.
- 5- A return with a full refund will only be accepted for products that are intact and have no signs of installation.
- 6- Keep away from contact with liquids as short circuits or dangerous situations may occur.

SAFETY PRESCRIPTIONS

1. Please pay attention to safety in traffic. Do not use the product in violation of the Highway Code and national, European and international regulations relating to road safety.
2. For your safety, please do not watch videos or play them while driving. And please adjust the sound volume to a level that is appropriate so that you can hear the sound from the outside. Do not use headphones with a high volume so that you will not hear noise outside the passenger compartment of the vehicle.
3. If you have problems with the system, park your car in a safe place, and ask your installer or dealer for assistance. Do not use the product, its applications, or the rear-view camera mode (if purchased) if this distracts attention in any way from safe driving. If you find it difficult to use the product or read the display, park your vehicle in a safe place before performing any operation.
4. If you notice smoke, noise, or a strange smell coming from the product, or any other abnormal signal on the screen, immediately turn off power to the product and consult your seller.
5. Follow traffic rules and traffic laws when using the satellite navigation function.
6. Do not allow children to use this device.
7. Please do not use this device in areas where the use of electronic equipment is prohibited or in places where fire is prohibited, such as gas stations, distilleries, or areas of electromagnetic interference. Otherwise, it may cause danger.
8. Do not park or leave the machine, especially the LCD screen, in the place where it is exposed to direct sunlight, or place it in other environments with harmful substances. If during installation, the LCD screen is located near the air conditioner fan, make sure that the air does not go directly onto the radio.
9. To ensure the normal operation of the machine and prevent the occurrence of fire or electric shock, do not expose the machine to moist air, or allow liquids to spill on the radio.
10. Do not disassemble or modify the product, as there are high-voltage components inside the product that can cause short circuits. Be sure to contact your seller for an internal inspection or repairs.
11. To ensure safe operation, some functions are disabled until the vehicle is stationary with the handbrake applied.
12. On vehicles, it is mandatory to connect the handbrake wire which inhibits the execution of videos on the move.
13. Do not install the product in places where this may obstruct the driver's view or prevent certain safety operations, such as air bags, hazard warning lights, or even prevent safe driving.
14. Using this product with the engine off may drain the battery

For technical assistance: Can open a technical assistance ticket by writing to assistenza@jfsound.it

INSTALLATION

WARNING: INSTALLATION AND REMOVAL OF DEVICES MAY ONLY BE CARRIED OUT BY TECHNICALLY QUALIFIED PERSONNEL. THE CAR SYSTEM MUST MEET SAFETY REQUIREMENTS AT ALL TIMES. BEFORE PROCEEDING WITH THE INSTALLATION ON THE DASHBOARD, CHECK THAT ALL THE CAR'S SAFETY SYSTEMS ARE WORKING CORRECTLY. THE RADIO SHOULD NOT BE INSTALLED IF THE CAR'S SAFETY SYSTEMS ARE NOT FOUND TO BE WORKING PROPERLY.

IMPORTANT: BEFORE PROCEEDING WITH THE ASSEMBLY, SIMPLY CONNECT THE WIRING HARNESSES TO TEST ALL THE FUNCTIONS, WITHOUT INSTALLING THE CAR RADIO INSIDE THE DASHBOARD. IN THIS WAY, THE PRODUCT WILL REMAIN INTACT AND CAN THUS BE RETURNED/REPLACED IN THE SAME CONDITIONS OF SALE, THEREFORE WITHOUT ADDITIONAL COSTS. IT IS NOT POSSIBLE TO OBTAIN A FULL REFUND FOR PRODUCTS THAT SHOW SIGNS OF INSTALLATION (OR OTHER IMPERFECTIONS), IN THIS CASE THE PRODUCT WILL BE SUBJECT TO EVALUATION (SEE CONSUMER CODE ART.57).

BEFORE GETTING READY TO DRIVE, CHECK THAT ALL THE CAR'S SAFETY SYSTEMS ARE WORKING CORRECTLY, DO NOT USE THE VEHICLE IF YOU ARE NOT SURE THAT IT MEETS THE SAFETY REQUIREMENTS NECESSARY TO ENSURE A SAFE OPERATION. JFSOUND DECLINES ALL RESPONSIBILITY FOR DAMAGE ATTRIBUTABLE TO THE USE OF THE VEHICLE IN CONDITIONS THAT DO NOT COMPLY WITH SAFETY REGULATIONS.

BEFORE INSTALLING THE RADIO

First of all, check the integrity of the device and its accessories, if defects or imperfections are found, do not proceed with the installation and contact JFsound technical assistance by writing to assistenza@jfsound.it explaining the problem and attaching any photos.

Before connecting the radio, check that the supplied connectors are compatible with those of the car, in case of doubt contact JFsound technical assistance by writing to assistenza@jfsound.it explaining the problem and attaching any photos of the original connectors of the car and photos of the rear of the original radio.

Disconnect the cable from the negative (–) terminal of the battery before installation. Wiring and installation with the negative (–) battery terminal connected may cause electric shock and injury due to a short circuit. Some automobiles require specific procedures to disconnect the battery terminal.

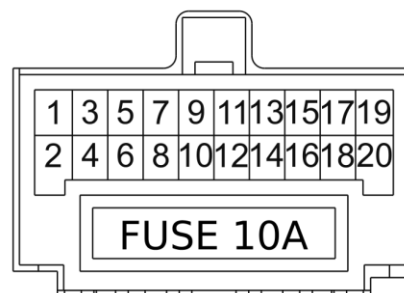

FAILURE TO FOLLOW THE PROCEDURE MAY RESULT IN UNINTENTIONAL MALFUNCTION OF SAFETY SYSTEMS, RESULT IN DAMAGE TO THE VEHICLE, PHYSICAL INJURY, OR DEATH.

WARNING: setting the blocking of moving videos is a legal obligation, the unlocking function is allowed only for non-mobile stations (displays, audio consoles, etc.), when the JFsound radio is installed on moving vehicles (vehicles, campers, trucks, etc.) it is mandatory to leave this option always active, check that with the handbrake released the videos are not played.

JFsound srl assumes no responsibility in the event of improper use of the product.

MAIN CONNECTIONS

1: GND	2: B+	3: RR-	4: RR+
5: FR-	6: FR+	7: RL+	8: RL-
9: FL+	10: FL-	11: BRAKE	12: ACC
13: AMP-CON	14: REVERSE	15: KEY1	16: ANT
17: KEY2	18: RX	19: ILL	20: TX

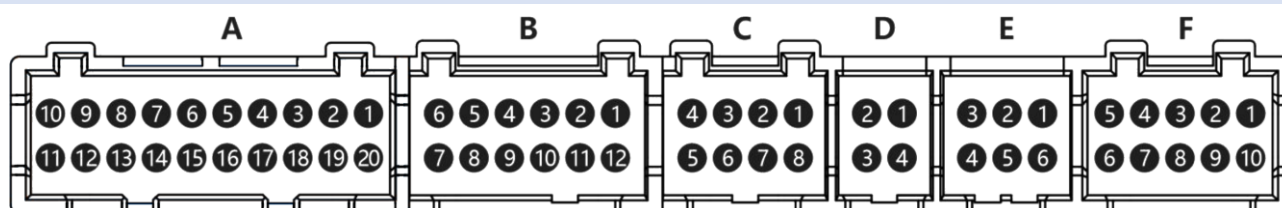

1	GND
2	B+ 12V Battery - this pin must remain at 12V even with the ignition off (memory maintenance)
3	Negative Right Rear Speaker
4	Positive Right Rear Speaker
5	Front Right Negative Speaker
6	Positive Right Front Speaker
7	Positive Left Rear Speaker
8	Negative Left Rear Speaker
9	Positive left front speaker
10	Negative Left Front Speaker
11	Connection to the handbrake for disabling video in motion (ormandatory for mobile devices)
12	ACC Subkey for switching the radio on and off when the ignition is switched on*
13	Ignition control AMPLIFIER (REM)
14	REVERSE control input for activating the rear-view camera (BACK/REVERSE)**
15	KEY1 input1 for resistive steering wheel controls
16	Antenna control , 12V is activated when the radio is switched on
17	KEY2 input2 for resistive steering wheel controls
18	RX Serial Input
19	Light control/ Lighting (puts the radio in night mode)
20	TX serial output

*WARNING: The radio turns on and off with the ignition activated by the ignition key. Connecting this wire directly to 12V may drain the battery.

**The radio switches to retro mode when there is 12V on this input. Generally this command comes from the canbus box supplied with the radio or directly from the car connector.

- 20 - DAB+ radio
- 21 - FM Radio
- 22 - Date & Time (press to adjust)

ADJUST TIME AND DATE

To adjust the date, time zone and time, press in the area shown.

SETTINGS

In the main menu, press the Settings button

	Internet Wi-Fi	Settings to connect the radio to the WIFI network
	Bluetooth JF sound	Bluetooth settings, PAIRING your phone
	Impostazioni del Veicolo	Radio/Car Aspect Settings
	Display Sfondo, sospensione, dimensione caratteri	Monitor Settings
	Audio	Set up audio
	Spazio di archiviazione Utilizzato: 48% - Liberi: 8,28 GB	Radio Storage Monitoring
	Sistema Lingue, ora	Language settings, now, reset connections
	Informazioni sul dispositivo auto_rk_t20	System Info

NETWORK AND INTERNET

ACTIVATE WI-FI: In the WI-FI section set the status to ON Choose the network and enter the password

ATTENTION. To access WIFI through your phone, you need to activate your phone's HOT SPOT. In your phone's settings, you will find both the name of the hotspot network generated by your phone and the password to access it. If the phone is seen by the radio but the connection does not work, check in the phone's WIFI settings that permissions are granted to the connection.

WHAT IT IS FOR: connecting the radio to the wifi network can be used to align the radio time.

BLUETOOTH

Pairing the phone with the radio:

- 1- ON THE PHONE Open the Bluetooth section of the phone and wait for the phone to be seen
- 2- ON THE RADIO press the name of the phone to be paired on the radio
- 3- ON THE PHONE give consent to finish the procedure.

VEHICLE SETTINGS

Factory settings: section dedicated to installers only covered by password.

Light detection: detects the presence of headlights on/off.

Handbrake detection: Moving video block, detects the presence of the handbrake to inhibit the viewing of videos during the movement of the vehicle.

WARNING: setting the blocking of moving videos is a legal obligation, the unlocking function is allowed only for non-mobile workstations (displays, audio consoles, etc.), when the radio is installed on moving vehicles (vehicles, campers, trucks, etc.) It is mandatory to leave this option always active, check that with the handbrake released the videos are not played.

External Power Amplifier Control: Turns the external amplifier on/off when driven by the radio. If selected, 12V comes out of pin13 of the power connector and pin10 of auxiliary connector A.

External video input signal: with this item you can select how you want to display the AUX video input (pin19 of auxiliary connector A).

AV IN -> option the camera will be displayed when opening the AV IN application

OPTION **Front Camera** -> the camera will be displayed for ten seconds after the reverse maneuver and open the Front Camera application

DTV OPTION -> the camera will be displayed when opening the DTV application

Reboot the system: Performs a system restart without erasing the settings

Erase All Data (Factory Data Reset): Performs a factory reset of the radio by erasing all data in the memory including accounts, memories, and preferences. Does not delete the auto settings of the password-covered menu.

DISPLAY

Backlight brightness: Adjusts the backlight of the monitor LCD panel.

Colored light: Selects the color in which the touch buttons on the monitor are illuminated. If you select the AUTO item, the colour will vary continuously following the colour sequence displayed.

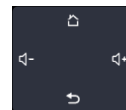

Image and Boot: Setting to select the boot logo. To add an image: Prepare a PNG image with dimensions **1280X720** for 9" and 10" monitors or **1024X600** for 6.2" to 8" monitors. In a FAT32 formatted USB flash drive create a folder and name it "**logo-factory**", inside this create another folder and name it "**logo**". Insert the USB stick into the radio, the radio will ask if you want to update, press the "Start Update" button. At this point we will find the added image on the boot image selection screen.

Background: From this setting, you can select the background image of the radio. You can select the image from **Wallpapers** (a set of suitable wallpapers preloaded on the radio) or from **the Gallery** which takes the image from the USB stick inserted in the radio and from the "Pictures" folder located in the radio's internal memory. To reach the Pictures folder in order to copy background files into it: **Open the Files** application on the left side, select **HD**, and then select the **Pictures folder**.

Restore default background: clicking on this item restores the default background.

Virtual buttons: by clicking on this item, a button  appears that can be placed on the monitor that opens a panel where we can find the Vol+, Vol-, Home, Back buttons. To make the positionable button disappear, simply click on this item again.

Current screensaver: by clicking on this item we can select the preferred type of screensaver that will be activated or not depending on the setting of the item below "Turning off the screen".

Screenswitch: in this section you can set whether and after how long from the last touch on the monitor the screen saver set in the above item will come into operation.

AUDIO

High Audio in Reverse: Adjusts the volume attenuation when reversing.

System volume: Adjusts the overall volume of the system. This volume is the general volume.

Bluetooth Display: Adjusts the volume of the Bluetooth channel.

Ringtone: Changes the sound the radio makes when a phone call is received.

Sound adjustment: opens the equalizer and the balance/fader.

Microphone: Sets the sound capture from the **Internal** microphone or **the External** microphone.

STORAGE SPACE

In this section, you can view memory management and optimize space by deleting unnecessary files. ATTENTION! The "Memory Management" item leaves the radio free to manage the memory independently, this means that it may delete files that it deems unnecessary without warning or copy files or history of use of the radio taking up additional space on the memory.

SYSTEM

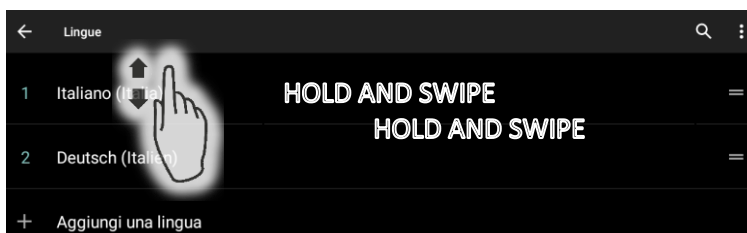

Languages and input: in this section we can change the language of the radio.

To do this, click on then on then select the language.

The language you choose will be added to the list.

The current language of the radio will always be the language that is at the top of the list.

To delete a language, press the 3 dots at the top right, select the language to be deleted and press the icon

Date and time: adjust the date, time zone and time. ATTENTION! To acquire the **correct time**, it is necessary to connect the **radio's** WIFI to a network. In a few seconds the radio aligns to the time zone and will no longer require the WIFI connection for alignment.

ABOUT THE TABLET

In this section, we find information about the system of the device

AUDIO

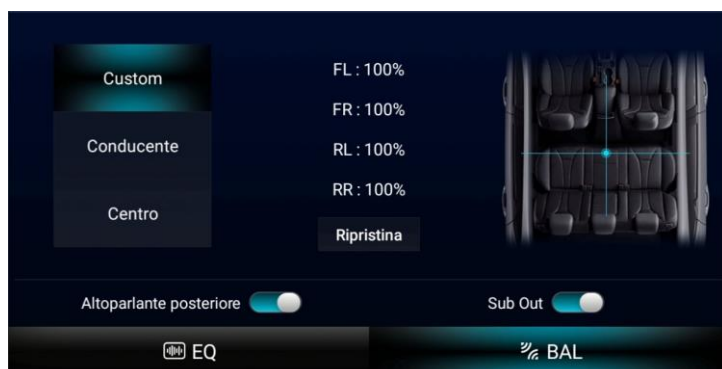

Output audio settings on speakers section

BALANCE

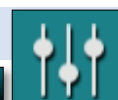

This section adjusts the volume of individual speakers

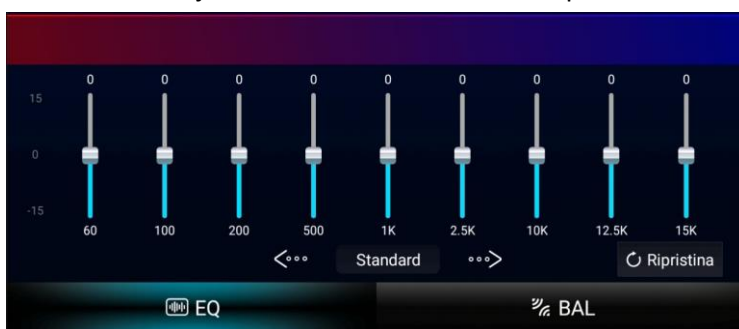

Custom	Setting defined by the
Driver	Activate only the driver speaker
Center	Puts the cursor in the center
Restore	Puts the cursor in the center
Speaker posterior	Turn on/off the RCA outputs of the rear speakers
Sub Out	Turn on/off the RCA Sub output

EQUALIZER

This section adjusts the volume of individual speakers

Selecting the EQ profile:
 Standard: Flat EQ
 Classical: for listening to classical music
 Pop: for listening to pop music
 Rock: for listening to rock music
 Jazz: for listening to jazz music
 Custom: User Defined

BLUETOOTH

	Keypad dialer to dial phone numbers.
	Press the and button to download contacts from the phone.
	Log of received/dialed/missed calls
	Collect your favorite phone numbers from your contact list.

APPLICATIONS

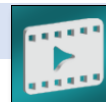

AUDIO FILE PLAYER

	Previous track
	Next track
	Play
	View songs in memory
	Play songs sequentially
	Play a single song in rotation
	Shuffle

Supported formats are: MP3, WMA, AAC, RM, FLAC

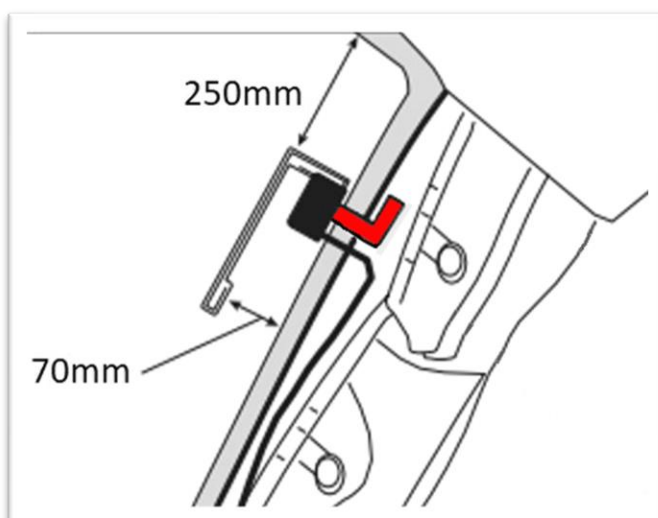

VIDEO FILE PLAYER

	Play
	Previous video
	Next video
	Return to the default screen
	Video format
	Minimize in a corner of the screen

Supported formats are: MPEG 4, RMVB, H264, H263, VC1, RV, Divx , Mkv

DAB+

To listen to DAB+ radio, open the DAB+ app. On first start, search for channels by pressing on the lens symbol

ATTENTION! In some cases the channel search can take up to a few minutes, do not leave the screen so as not to interrupt the procedure.

SETTINGS

By pressing this button we find:

Trackingservice: SF if the station's signal becomes weak the radio searches for an alternative signal for the same station.

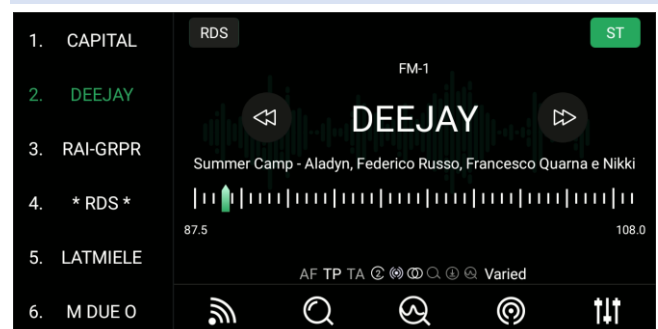

Station Sorting: Alphabetical/Frequency

DAB+ volume setting: Set the volume of the DAB+ source

DAB+ ANTENNA INSTALLATION: THE DAB+ AN-

TENNA MUST BE INSTALLED ON THE PASSENGER PILLAR, IN VERTICAL ORIENTATION, AT LEAST 25cm FROM THE ROOF OF THE CAR, ATTACH THE ADHESIVE COPPER TAB (IN THE PHOTO IN RED) TO THE METAL PART OF THE CAR (NO NEED TO SCRATCH THE PAINT). Once the installation is complete, lay the excess cable by placing it in a slot along the post. WARNING: if the car window is shielded, the antenna will not be able to receive the DAB+ signal, if the car is fitted with non-original headlights or components, they may generate signals that disturb or cancel the DAB+ signal.

RADIO AM/FM

	Stereo signal
	Search for alternative frequency
	Traffic Info Automatic
	Search stations by topic
	FM station tuning
	AM Station Tuning
	Switch station bands
	Search and store stations
	Local Stations
	Balance/Fader Equalizer

To advance stations with search, press and hold one of the forward/backward arrow buttons for one second.

To store stations, press and hold for 3 seconds the position in which you want to store the station.

WARNING: if PTY is selected the radio will tune in only if there are FM stations with the selected topic. In the absence of thematic content, the radio will not receive any stations.

AUX IN

Selecting this application will cause the radio to play audio connected to the AUX inputs
See auxiliary connector A

UP CONNECT

UP Connect is the application that connects your phone to the radio

ANDROID CONNECTIVITY

To connect your phone directly with Android for Car features, simply connect your phone to a USB cable on your radio and follow the instructions that appear on your phone.

If the USB connection goes from the car's original USB socket recovery, the connection may not work.

ONLY FOR -PRO VERSION: To connect the phone wirelessly, simply pair the phone's Bluetooth with the radio and press the UPconnect button.

ATTENTION! After connecting, unlock your phone and give consent to start the connection.

IPHONE CONNECTIVITY

To connect your phone with your radio, simply connect your phone to the 4pin USB cable labeled CarPlay.

WARNING: iSiri must be active on your phone for the connection to work.

If the USB connection goes through a recovery car's original USB socket, the connection may not work.

You can only connect iPhone using the single USB socket with 4pin (see photo)

ONLY FOR -PRO VERSION: To connect your phone wirelessly, simply pair your phone's Bluetooth with the radio and press the UPconnect button.

ATTENTION! After connecting, unlock your phone and give consent to start the connection.

TOLISTEN TO FM RADIO WHILE CONNECTED, INSTALL THE TUNEIN APPLICATION ON YOUR PHONE. You just need to install it, you don't need to enter the application on your phone.

FEATURES

TUNER

Europe/Asia/Thailand wavelength ranges: FM (VHF): 87.5 -108 MHz; US Waveranges: FM (VHF): 87.7 - 107.9 MHz; South America wavelength ranges: FM (VHF): 87.7 - 107.9 MHz; FM transmission ranges: 30 - 15000 Hz; FM Frequency Range: 87.5-108MHz

WIFI

Support standards: 802.11b, 802.11g, 802.11n-HT20/40 Maximum Output Power: 19.72mW

Frequency Range: 2412-2472MHz for 802.11b/g/n(HT20)-2422-2462MHz for 802.11n(HT40); 5180-5240MHz 802.11a/n

BLUETOOTH

Bluetooth Version: Bluetooth V 5.0 Freq. Range: 2402-2480MHz Maximum Output Power: 2.19mW

USB

USB - USB 2.0 Standard Spec Max. Supplied Current 500 mA File System FAT16, FAT32 Maximum Memory Capacity 16 GB
Decoding Format: Audio: MP3, WMA, AAC, RM, FLAC Video: MPEG 4, RMVB, H264, H263, VC1, RV, Divx

EU DECLARATION OF CONFORMITY

JFsound S.r.l, with registered office in Forlì, via Campo dei Fiori 4, 47122 Forlì (FC) VAT. 04287900403, under its own responsibility as manufacturer, declares that the device is the device of
It complies with the RED Directive 2014/53/EU
